

**AES-25**  
AUTOMATIC ELECTRIC STEERING

**Specifications**

Dimensions	38 x 38 x 21 cm
Power Supply	12 VDC nominal
Temperature	
Operating	-20 to 60°C
Storage	-40 to 80°C
EMC	FCC, CE mark, Ctick

AGI-4

X-Family Consoles

## Electric Convenience with Full Hydraulic Performance

- Fast, accurate steering response
- Up to 2 cm accuracy
- Full terrain compensation
- Reverse operation
- Convenient, simple installation
- Easily transferable

The AES-25 by Topcon provides smooth operation and precise steering control in an easily retrofitable solution for older vehicle and non steer-ready platforms. It is adaptable to various types of regional or specialty machinery.

With a direct-drive, high-torque motor, the AES-25 provides silent operation and the most accurate electric steering in the world. The AES-25 outperforms all other electric steering solutions. Installation is clean and neat with no external components to interfere with normal operation in the cab.

Utilizing the AGI-4 receiver and steering controller, farmers can start at the accuracy needed for particular jobs, then step up to real-time kinematics (RTK) with confidence that they will achieve full 2 cm accuracy. For operators who want precise performance, AES-25 electric steering provides row crop steering accuracy without the complexity of hydraulics.

Compatible with all Topcon consoles, the AES-25 provides the convenience of electric steering with the performance of hydraulics.
